Chancellor's Message to the Graduates

Today we honor those of you who have pursued your desire for knowledge in more than 200 fields of intellectual study. Such learning is at the heart of the University's role in society. Our success has been due in large part to your aggressive participation in interpreting and challenging the ideas of the past.

In order to further strengthen the high quality of our educational efforts, we now depend on you to maintain contact with your University and to let us know how we can serve your successors even more effectively.

Congratulations on your achievements. We hope you will be as pleased with what we have tried to provide as we are proud of what you have accomplished.

The College Park Campus and the University

The Students

College Park is dedicated to young people. The Campus gives all students the chance to encounter new persons, new ideas and new interests, all of which they could hardly find elsewhere in such variety. Students may discover ancient Greece for the first time; they try their hand at art; or they may use a computer to help design a better environment for man.

But whatever they investigate, whether it is under a microscope, or out in space or within the human mind, their experiences sharpen their vision and improve their judgment. They learn in and out of class, by relating to many people of their own age and by dealing with a cultured faculty. They are able, in these many ways, to better define their directions and their goals.

The Faculty

The men and women who instruct our students at College Park are teachers and scholars who bring to the classroom a depth of knowledge, experience and learning that ranks among the finest of any university campus. Their work ranges from the study of physical forces to the study of man in all his complexities. Some scholars are searching for practical applications of solar energy, discovering new galaxies of stars or researching substitute processes for pasteurization to increase the shelf life of milk, while others are administering stress tests to study coronary artery disease, debating the philosophical beliefs of the founders of our nation, or studying the world of black Americans at the turn of the century. All of them are sharing the results of their learning with their students in the classroom.

One way to describe this campus is through the interaction of students and faculty, but other points of view are interesting too.

The Campus

Located in suburban Maryland just nine miles from the Nation's Capital, the College Park Campus offers a diversity of cultural, political and scientific resources to its students.

The campus is a spacious one of 1,300 acres. Some of its 228 Georgian-style buildings overlook playing fields, the tree-lined central mall, or rolling lawns, while one or two border the few remaining open fields of grazing land belonging to the University.

In enrollment, College Park is among the 10 largest campuses in the country. Undergraduates enrolled in fall 1975 numbered over 28,500 and graduate students over 7,000 for a total enrollment of over 35,500. This year's College Park operating budget is \$131,552,289. The University assisted over 7,000 College Park students with scholarship aid in 1974-75.

Students may choose from 71 undergraduate and 67 graduate programs leading to degrees.

In 1974-75 a total of 5,251 undergraduate, 1,416 master's and 385 doctorate degrees were awarded by the College Park Campus. In number of doctorates granted annually, the University ranks among the top thirty in the nation.

History

The University had its beginnings in 1807 with the establishment in Baltimore of the College of Medicine, an entirely faculty-owned institution granting the M.D. degree. When its name was changed to the University of Maryland five years later, it was given power to confer additional degrees. The first dental school in America, the Baltimore College of Dental Surgery, became a part of the University in 1840. Subsequently, the University opened schools of pharmacy, law and nursing.

Under a charter secured by a group of Maryland planters, the College Park Campus of the University, then called the Maryland Agricultural College, opened in 1856 and became one of the original land-grant schools in 1865. After a disastrous fire in 1912, the State acquired control of the College and bore the cost of rebuilding. In 1920 the State took over the faculty-owned University in Baltimore, merging it with the State-owned institution at College Park to form the present day University of Maryland.

In 1886 the Delaware Conference Academy was founded by the Methodist Church in Princess Anne, Maryland. The State acquired this institution in 1926, making it a division of the University of Maryland in 1948. It was made a Campus of the University of Maryland Eastern Shore (UMES). A new campus known as University of Maryland Baltimore County (UMBC) was opened at Catonsville in 1966.

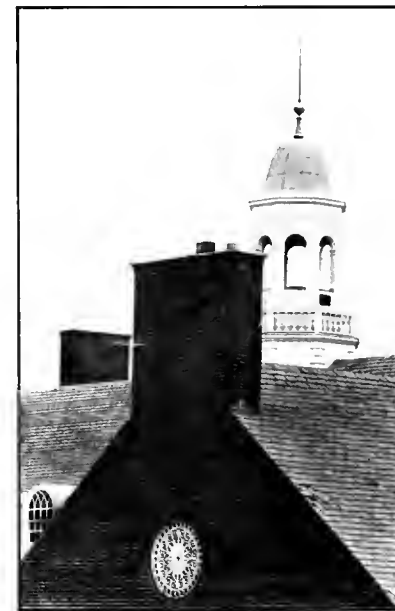

Libraries

University libraries include approximately 1,465,000 volumes on the College Park Campus, 11,000 subscriptions to periodicals and newspapers, plus nearly 875,000 microform units, as well as many slides, film strips, music scores, and recordings. The Undergraduate Library has a seating capacity of 4,000 students and is among the nation's largest. Facilities include a quadraphonic concert room, color video tape players and playback units, enclosed rooms equipped with instructor's consoles for the use of nonprint media materials and wireless stereo headsets for tapes of lectures, plays, speeches, and music.

Research Facilities

Among the exceptional research facilities are: a 140 MeV cyclotron; a nuclear reactor; scanning electron

microscopes; subsonic, supersonic and hypersonic wind tunnels; an electron ring accelerator; a precision encoder and pattern recognition device; a gravitational radiation detection system including a gravimeter on the moon; a quiescent plasma device (Q machine); a psychopharmacology laboratory; three retro-reflector arrays on the moon; rotating tanks for laboratory studies of meteorological phenomena; Van de Graaff accelerators; a laboratory for basic behavioral research; an assortment of computers; the Astronomy Observatory, Center of Materials Research, Institute for Fluid Dynamics and Applied Mathematics, Institute for Molecular Physics, and the Water Resources Research Center.

The College Park Campus also owns and operates one of the largest and most sophisticated long-wavelength radio telescopes (located in Clark Lake, Calif.) and a cosmic ray laboratory (located in New Mexico).

In addition to these research opportunities in the biological, mathematical and physical sciences, research programs in the behavioral sciences, social sciences and education exist in many bureaus and institutes including: the Bureau of Business and Economic Research, Bureau of Educational Research and Field Services, Bureau of Governmental Research, Institute for Child Study, Institute for Criminal Justice and Criminology and the Institute for Urban Studies.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession are of ancient origin. They have been the traditional costume of the scholar since medieval times and probably represent an adaptation of the ecclesiastical dress, since many of the scholars of that period were members of monastic orders.

An intercollegiate commission in 1893 drafted a uniform code for costumes which has since been adopted by the majority of colleges and universities in the United States.

Each of the three academic degrees—bachelor, master, and doctor—has its own distinctive gown and hood. The bachelor's gown is distinguished by its long pointed sleeve. The master's gown has a longer, narrow, closed sleeve, extending below the knee; the arm is passed through a slit at the elbow. In contrast, the doctor's gown has a full bell-shaped sleeve with three bars of velvet. The opening of

this gown is faced with wide velvet bands. The velvet trim may be black or of a color indicating the general field of learning of the wearer, for example, blue for philosophy, green for medicine, purple for law.

The most colorful and distinctive item of the academic costume is the hood which passes around the neck and extends down the back. The doctor's is the largest of the hoods and the bachelor's the smallest. The bachelor's hood is often omitted. The color of the velvet edging indicates the field of learning. Below is given a list of department or faculty colors.

Agriculture/Maize
Arts, Letters, Humanities/White
Business Administration, Commercial Science/Drab
Dentistry/Lilac
Economics/Copper
Education, Pedagogy/Light Blue
Engineering/Orange
Fine Arts, Architecture/Brown
Forestry/Russet
Home Economics/Maroon
Humanics/Dark Crimson
Laws/Purple
Library Science/Lemon
Medicine/Green
Music/Pink
Nursing/Apricot
Oratory/Silver Gray
Pharmacy/Olive
Philanthropy/Rose
Philosophy/Blue
Public Health/Salmon
Physical Education/Sage Green
Science/Golden Yellow
Social Service/Citron
Surgical Chiropody/Nile Green
Theology and Divinity/Scarlet
Veterinary Sciences/Gray

The colors of the silk lining exposed in the center of the hood are those of the college or university which conferred the degree.

The cap or "mortar board" is uniform in design for all degrees. The tassel may be either black or the color of the field of learning. The tassel of the doctor's cap may be gold.

From Europe the use of academic degrees spread to English universities. Harvard University, William and Mary, and Yale followed the British pattern in the United States.

Academic Degrees

A degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by American colleges and universities.

The first known degree was a doctorate conferred by the University of Bologna in the middle of the 12th Century. Originally, the doctor's and master's degrees were used interchangeably, each indicating that the holder was qualified to give instruction to students. The bachelor's or baccalaureate degree indicated only entrance upon a course of study preparatory to the doctorate or mastership. Gradually, however, the bachelor's degree came to mean successful completion of one level of study preparatory to the higher degrees.

The Doctor's Degree

This is a term meaning teacher, or instructor, applied by ancient Romans to those who delivered public lectures on philosophical subjects. In the Middle Ages, from the 12th century, it came into use as a title of honor borne by men of great learning. It was first made an academic title at the University of Bologna, in Italy, which received

from the emperor the right of appointing *doctores legum* (doctor of laws). The University of Paris followed in 1145. Soon after, the popes granted the universities the right of appointing doctors *canonum et decretalium* (teachers of the canon law); and when the study of civil law came to be combined with that of the canon law, the title was changed to doctor *utriusque juris* (teacher of both laws). The faculties of theology and medicine followed that of law in conferring this title.

The doctorate in philosophy and science, and occasionally in theology and law, is given beyond the baccalaureate degree, and requires two to five years, the writing of a thesis, and the passing of written and oral examinations.

The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the professional or practitioner's degree, and the research degree. The first type represents advanced training for the practice of various professions, principally: Doctor of Medicine, Doctor of Dental Surgery, Doctor of Veterinary Medicine, Juris Doctor and Doctor of Pharmacy. These degrees carry no implication of original research and are classified by the U.S. Office of Education, with bachelor's degrees, as the first professional degrees. The University of Maryland awarded the first two dental degrees in history, on March 9, 1841, and invented the name of the degree, D.D.S., as well.

The second type of doctor's degree is classified as research doctorates representing prolonged periods of advanced study, usually accompanied by a dissertation which is designed to be a substantial contribution to existing knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the

United States by Yale University in 1861.

The first Ph.D. was awarded at the University of Maryland in 1920.

The Master's Degree

The master's degree is an academic honor conferred upon students who have successfully completed work in advance of the baccalaureate. A thesis and an oral examination are usually required. The word *magister*, connected with a qualifying phrase, was used among the Romans as a title of honor; but its present meaning must be traced to the time of the establishment of the oldest universities. Regularly organized faculties were not then known as they now exist in the universities. The whole circle of academic activity was limited to seven liberal arts, and those who received public honors on the completion of their course of studies, for their diligence and knowledge, and had already received the degree of baccalaureate (bachelor) were called *magistri artium* (master of the liberal arts).

In 1920 the new University of Maryland awarded its first M.A. and M.S. degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents completion of a four-year course of study of collegiate grade and is the oldest academic degree used by American institutions of higher learning. The degree Bachelor of Arts was first conferred in America in 1642 on the first nine graduates of Harvard College.

Maryland Agricultural College, which was later to become the University of Maryland College Park, awarded the first Bachelor of Arts and Bachelor of Science degrees in 1862.

Honorary Doctor of Laws

Russell E. Train

Soon after the Environmental Policy Act of 1969 was signed into law making the protection of our natural resources a matter of national policy, Russell E. Train was chosen as the first chairman of the Council on Environmental Quality. The appointment of Train was widely hailed by conservationists. An internationally esteemed conservationist and leader in efforts to protect the nation's vulnerable natural resources, Train has continued in his current position as Administrator of the U.S. Environmental Protection Agency to dedicate himself toward the prevention of pollution and the creation of a cleaner environment.

Train was appointed Administrator of the Environmental Protection Agency in September, 1973. As head of the EPA, he oversees an agency created as a cabinet level executive branch regulatory agency which sets and enforces the nation's pollution control standards.

He came to the EPA from the Council on Environmental Quality where he served as its first chairman from February 1970 until 1973. Prior to that appointment he served as Under Secretary of the Interior

As head of the Council on Environmental Quality, Train was chief advisor to the president on environmental policy, supervising the development of national policy on environmental, legislative and administrative programs. During that time the CEQ developed national land use policy, regulation of surface mining, ocean dumping controls, pesticide regulation, and toxic substances control. It also provided leadership in the implementation of the National Environmental Policy Act by all Federal Agencies.

Russell Errol Train was born on June 4, 1920 in Jamestown, Rhode Island. He graduated from Princeton University in 1941 with a B.A. and served in the army from 1941 to 1946, rising to the rank of major in the Field Artillery. After graduation from Columbia University law school in 1948 with an LL.B., he became a tax lawyer. He joined the Joint Committee on Internal Revenue Taxation and from 1953 to 1956 served as Clerk and then as Minority Advisor to the Committee on Ways and Means of the House of Representatives. In 1956 Train was named Assistant to the Secretary of the Treasury Department and Head of the Legal Advisory Staff. In 1957 President Eisenhower appointed him a judge of the Tax Court of the United States, and in 1959 he was reappointed to a full 12 year term.

Long fascinated with Africa, Train went on a big game hunting safari in 1956. That trip aroused his concern for conservation, and he gradually became interested in conservation organizations and activities. He founded and became president of the African Wildlife Leadership Foundation in 1959, and by 1965 he had become so involved in conservation causes that he decided to resign from the Tax Court and begin a new career in conservation. In August, 1965 he became president of the Conservation Foundation, a nonprofit research, education and information organization concerned with environmental problems in the U.S.

He was appointed to the National Water Commission in 1968 and then became chairman of a special task force to advise the incoming administration on environmental matters. In February, 1969 he became Under Secretary of the Interior and served in that capacity until he became chairman of the Council on Environmental Quality.

Train has received honorary degrees from Bates College, St. Mary's College, Worcester Polytechnic Institute, Princeton University, Drexel University, Columbia University, Clarkson College of Technology, the University of the South,

Southeastern University, and Salem College. In 1972, he was awarded the Albert Schweitzer Medal by the Animal Welfare Institute. In 1975, he received the Aldo Leopold Medal of the Wildlife Society and the Conservationist of the Year (1974) Award of the National Wildlife Federation.

He is awarded the Honorary Doctor of Laws from the University of Maryland.

Honorary Doctor of Science

Robert F. Chandler

At a time when the world population is spiraling upward at the rate of ninety eight million people a year and mass starvation on a scale never before envisioned has become more than a remote possibility, the world has turned to the United States for leadership in solving the world food crisis. Robert Flint Chandler, Jr., distinguished leader in world food production, has spent a lifetime trying to find new and better ways to improve and increase food production. Noted researcher, administrator, teacher, and international consultant in the field of agricultural sciences, Chandler has been at the forefront of multi-governmental research in rice and vegetables in attempts to find viable solutions to the mounting crisis of world wide hunger.

Chandler retired as Director Emeritus of the Asian Vegetable Research and Development Center on June 30, 1975. The organization, which he founded in 1972, is a multi-government research consortium located in Taiwan. Before founding the center, he directed the International Rice Research Institute in Manila, Philippines.

From 1954 to 1957 Chandler served as assistant director of the Division of Natural Sciences and Agriculture for the Rockefeller Foundation in New York City and then as associate director of the Division of Agricultural Sciences at the foundation.

Before that time he was a university professor and administrator.

He served as president of the University of New Hampshire from 1950 to 1954, where he had been dean of the College of Agriculture and director of the Experimental Station from 1947 to 1950. He was professor of forest soils at Cornell University from 1935 to 1947 and in the summer of 1940 was visiting professor of agronomy at Texas A & M University.

Born on June 22, 1907 in Columbus, Ohio, Chandler received his Ph.D. from the University of Maryland in 1934 following research in the field of mineral nutrition of vegetable crops.

Postgraduate degrees and honors include: NCR Fellow, University of California, 1935; LL.D., Notre Dame University, 1971; Litt. D., University of Singapore, 1971; L.H.D., Central Luzon State University, Philippines, 1971; Sc.D., Punjab Agriculture University, India, 1971; Sc.D., University of the Philippines, 1972; Sc.D., University of New Hampshire, 1972.

He is co-author of *Forest Soils* with Harold J. Lutz, 1946.

He is a trustee for the China Foundation for Promotion, Education and Culture in Taiwan and is a member of the American Society of Agronomists, Crop Scientists Society of America, Society for International Development, American Association for the Advancement of Science, Newcomen Society, and the S.A.R. Club. He is a Fellow of the American Academy of Arts and Sciences.

Chandler has received many awards during his long research and administrative career including the Gold Medal Award from the government of India in 1966, the Sitara-i-Imtiaz Award from the government of Pakistan in 1968, the Golden Heart Award from the government of Philippines, and the International Agronomy Award in 1972.

He is awarded the Honorary Doctor of Science from the University of Maryland.

December 21, 1975 Graduate School

The 1975 class roster is comprised of degree candidates from the undergraduate and graduate programs at the University's College Park Campus. As final action can not always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The University reserves the right to withdraw or add names. All diplomas will be mailed by the Registrations Office.

Students who have earned their degrees from the College of Education may obtain a Statement of Certificate Eligibility in the College of Education Office of Student Services (Room 3201) until 4:30 p.m. today. Other students who have completed teacher education programs will receive their statements in the mail (separate from the diploma) upon verification of required coursework.

Candidates will be presented by Dr. David S. Sparks, Dean for Graduate Studies.

Candidates for bachelor's degrees who have earned honors for scholarship upon graduation are indicated in the alphabetical listings by Division or College. To be eligible for consideration for such honors a candidate must meet the following general criteria (1) have completed two years of work at the University of Maryland (60 semester hours) and (2) have a scholastic average of B (Grade Point Average of 3.000) or higher in University of Maryland work prior to the last semester of registration before award of the degree.

Beginning with the December 1975 graduating class a change was made in the basis employed for determining scholarship honors and in the designations used in awarding these honors. Honors designations are now limited to the top ten percent instead of the top twenty percent of the candidates in each College or Division, and Latin names have been adopted for the designations.

Thus, the graduates in the alphabetical lists for August 31, 1975, who met the above general criteria are shown as graduating "With High Honors" if they ranked in the top ten percent of the candidates in their College or Division, "With Honors," if they ranked in the second ten percent.

However, December 1975 candidates who met the general criteria are shown in the alphabetical lists as qualifying, upon graduation, for the designations "Summa Cum Laude" if they ranked in the top two percent of the candidates in their respective Colleges or Divisions, "Magna Cum Laude," if in the next three percent, or "Cum Laude," if in the next five percent.

A Walking Tour Through the College Park Campus

There are many interesting educational and research facilities on the College Park Campus. We have selected some of these that you may wish to visit along a walking tour. These facilities are open on weekdays from 8:30 a.m. to 4:30 p.m. You are welcome to tour them at your leisure. Other points of interest on campus may be toured by appointment through the phone extension listed after each facility. For general information call the Student Union Information Center (454-2801).

Highlights

•**MEMORIAL CHAPEL-(BLDG. 78)** Regents Drive
Open to visitors weekdays 8:30 a.m. to 4:30 p.m. A schedule of multi-denominational services can be obtained in the North Administration Bldg.

•**NORTH ADMINISTRATION BUILDING-(BLDG. 83)** Regents Drive
This facility houses the Admissions Office of the University; Office of the Registrar for graduate transcripts and commencement information; and offices for student financial aid, housing, and campus employment

•**UNDERGRADUATE LIBRARY-(BLDG. 120)** Corner of of Regents and Campus Drives
Completed in 1972, the library is one of the finest in the nation. In addition to serving undergraduate students, it also houses at the graduate level the College of Library and Information Services

•**STUDENT UNION-(BLDG. 110)** Campus Drive
A new addition to the Student Union was completed in 1972. You can obtain a building directory and schedules of events and activities at the information desk in the front lobby. Guided tours are available to the bowling alleys, billiard room, ballroom, cafeterias, motion picture theatre, and exhibits.

•**COLE FIELDHOUSE-(BLDG. 27)** Campus Drive
With a permanent seating capacity of 12,500, the Main Auditorium of Cole Fieldhouse is used for basketball games, classes in physical education, commencements, concerts, academic testing, track, and many other indoor activities. Other areas of the building contain small gymnasiums, a swimming pool, classrooms, faculty offices, a ticket booth for athletic events, and the Department of Intercollegiate Athletics.

•**TAWES FINE ARTS CENTER-(BLDG. 115)** Campus Drive
You are welcome to visit the Art Gallery on the first floor. Offices of the departments of art, music, speech and dramatic art, and hearing and speech sciences are housed in this building. University Theatre is also located here, adjacent to Parking Lot # 1.

•**SCHOOL OF ARCHITECTURE BUILDING-(BLDG. 8)** Campus Drive
You are invited to walk through this facility and view displays of of student architectural designs and the faculty-designed sculpture in the West Court.
